

7-Fold Tie

code TIE

This tie is constructed using a unique folding technique and this is what makes the expensive store-bought Italian ties hang so nicely. This tie hangs so nicely you might even try making one out of cotton. Easy to make because the pattern includes a special folding template. Just press the paper pattern and then fold and press the tie along with the template. Pattern includes an X-long option 63" (1.57m) for tall men.

Materials required:

1 ¼ yds (112.5cm) silk

¾ yds (68cm) Armo Rite® (tie interfacing)

Optional:

Swedish Tracing Paper* to make a template that lasts.

Note:

Ties are cut on the bias. You can actually get 2 ties out of this amount. You can use silk as narrow as 19" (47.5cm).

**available at Birch Street Clothing*

INSTRUCTIONS ARE PRINTED ON PATTERN TISSUE
